

IP Endpoints

By using the Internet as part of your communications solution, your system is everywhere you want it to be. With Inter-Tel's powerful, IP endpoints, your data network seamlessly connects your local employees, remote staff and satellite offices as if they were all in the same building—providing you with functionality, mobility and flexibility like you've never experienced.

Model 8690

This visionary touch-screen endpoint runs on Microsoft®Windows®CE.NET, creating a framework for integrating applications such as Unified Communicator®software and enabling you to manage your communications with ease. The convenient soft phone interface enables you to initiate, hold, transfer and conference calls, as well as manage messages—using a stylus or your fingertip.

Model 8662

Model 8622

Model 8600

Inter-Tel's wide-range of IP endpoints offers a choice of deploying a variety of endpoint styles depending on your unique business requirements – from cost-effective entry-level endpoints to six-line, menu-driven endpoints. Whichever endpoint you choose, you will be secure in knowing that each model will harness the full capacities of the Inter-Tel Communications platform, enhancing the efficiency of resources and maximizing the return on your investment.

Business Productivity

- Comprehensive functions and capabilities brought directly to the desktop
- Optimized for reliable use in IP networks
- Built-in Ethernet switch ports enable streamlined desktop implementations
- Multiple IP endpoint options provide deployment flexibility and cost savings
